Growth Habit

- Cascading** - Generally a horizontal, weeping form.
- Fastigate** - Narrow upright, columnar, probably won't become half as wide as tall.
- Globose** - Globe in shape. Can become as tall as broad.
- Pendulous** - Weeping; will usually grow along or close to the ground unless staked.
- Prostrate** - Ground creeping habit, becomes much wider than taller, usually will not exceed three feet in height.
- Pyramidal** - Conical habit, typical of most conifer species and some cultivars.
- Spreading** - Horizontal branching, plant will generally be twice as wide (or more) as tall at maturity.
- Upright broad** - Ascending branches that spread with age usually will become at least half as wide as tall.
- Upright narrow** - Upright leader, lateral branching will vary, narrow profile similar to Fastigate plants.
- Upright open** - Upright leader, lateral branching is widely spaced.

Plant Zones

Hardiness information is based on the USDA chart below:

Zone	Temperature Range
Zone 1	Below -50° F
Zone 2	-50° F to -40° F
Zone 3	-40° F to -30° F
Zone 4	-30° F to -20° F
Zone 5	-20° F to -10° F
Zone 6	-10° F to 0° F
Zone 7	0° F to 10° F
Zone 8	10° F to 20° F
Zone 9	20° F to 30° F
Zone 10	30° F to 40° F

Plant Growth Rate

	Annual	In 10 - 15 years
Miniature -	Less than 3"	Less than 2' - 3'
Dwarf -	3" - 6"	3' - 6'
Intermediate -	6 - 12"	6' - 15'
Large -	More than 12"	More than 15'
